

AlcoHAWK® AVANTI

BREATHALYZER

The **AlcoHAWK® Avanti** is a digital breath alcohol screener that quickly checks for the presence of alcohol. This product features a SMART Fuel-Cell sensor, which is not subject to interference from acetone, and offers enhanced linear accuracy over traditional semi-conductor sensors.

FEATURES

Advanced SMART Fuel Cell Sensor

- Offers enhanced linear accuracy over traditional semi-conductor sensors.

Fast Warm-up/Response/Recovery Time & Accurate Results

- Fast warm-up for a quick start & consecutive tests
- Quick response time in 3 ~ 35 seconds
- Professional grade accuracy for successive testing
- Dual light LCD display with 4 digits and audio alerts
- Wide detection range up to 0.400% or 2.000 BrAC

Easy Calibration & Low Cost Maintenance

- One point (0.100% BAC/0.500 BrAC) automatic recalibration
- Longer sensor lifetime and long-term stability
- Economic sensor cost for A/S

Intelligent Functions & Reliable Performance

- Flow check technology
- Calibration check technology
- Working temperature check function
- Low battery warning
- Test time indication
- Automatic power-off

Others

- 9V battery power for stable & long time use
- Hygienic individual mouthpiece packing
- Professional looking design & light weight hand-held device
