

AlcoHAWK[®] RapidScreen

BREATHALYZER

Quick Non-Invasive
Alcohol Testing!

The AlcoHAWK[®] RapidScreen from Quest Products is the newest fuel-cell breathalyzer designed to test in both active or passive modes ideal in environments such as schools, roadside screenings, probations, jails, hospital and clinics and many more zero tolerance testing applications. The AlcoHAWK[®] RapidScreen is noninvasive, NO mouthpieces or special attachments are required, making screening for the presence of alcohol easier than ever!

Parents: Check your teens when they come home from outings.

Schools: Monitor kids, as well as open containers, for the presence of alcohol at any school function.

Employers: Enforcing a Zero-Tolerance policy has never been easier or quicker with the AlcoHAWK[®] RapidScreen fuel-cell breathalyzer.

Corrections: Test inmates returning from leave.

Hospitals and Clinics: Check patients for the presence of alcohol prior to administering medications.

Police and Law Enforcement: The AlcoHAWK[®] RapidScreen is ideal for testing drivers at road-side screening check points.
